Art Unit: 3641

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a projectile launcher, classified in class 42, subclass 18.
- II. Claims 9-14, drawn to a combination projectile launcher and projectiles, classified in class 42, subclass 105.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the specific chamber leading to the receiving area, the breechblock movable between a retracted position and a forward position, the trigger mechanism including a firing pin, and an extractor. The subcombination has separate utility such as a launcher for projectiles including sabots that are not ring airfoils. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- During a telephone conversation with Scott Weide a provisional election was made without traverse to prosecute the invention of Group I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-8 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Application/Control Number: 10/727,434 Page 3

Art Unit: 3641

Drawings

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: C and BP. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 2 (and 3) are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,671989. Although the conflicting claims are not identical, they are not patentably distinct from each other because it

Application/Control Number: 10/727,434 Page 4

Art Unit: 3641

would be obvious to one of ordinary skill in the art at the time the invention was made to have the position in which the moveable breechblock was located in the chamber be the retracted position and the forward position be the position that the breechblock is moved towards the receiving area, since it is forward and retracted are common terms in the art to describe such positions and the movement of the breechblock would effect the movement of the ejector that was coupled to it.

Allowable Subject Matter

- 7. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. The following is a statement of reasons for the indication of allowable subject matter:

 The prior art of record does not anticipate the claimed multi-shot ring airfoil projectile launcher for receiving a cartridge comprising a ring airfoil projectile mounted to a housing comprising; a body defining a receiving area, the body defining a chamber leading to the receiving area, a breechblock movably positioned in the chamber, a trigger mechanism including a firing pin connected to the breechblock, an extractor adapted to contact the cartridge when the cartridge is in the cartridge is in the receiving area and retain the housing of the cartridge upon firing; an ejector and a follower.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Austin et al. (US Patent # 3,919,799) and Oster (US Patent # 5,239,911). Any inquiry concerning this communication or earlier communications from the examiner should be directed

to Michelle (Shelley) Thomson whose telephone number is 703.306.4176. The examiner can normally be reached on Monday thru Thursday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703.306.4198. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
